EDUCATION

Brown University | *Sc.B. Computer Science & Economics*

Providence, RI | **Expected May 2028**

- **GPA:** 3.85 | **Coursework:** Operating Systems, Algorithms, Software Engineering, Deep Learning, Linear Algebra
- **Awards:** 2nd Place, Palantir Coffee Cup Hackathon | VEX Robotics CA Regional Champion; top 0.3% team globally

EXPERIENCE

PartyPlace [↗](#) | *Software Engineer Intern*

New York, NY | **Jun 2026 – Present**

- Full-stack engineer at a group-booking startup with **200+ live NYC venues**; own the venue dashboard and booking UI
- Integrated Stripe deposits and card holds into a NestJS/PostgreSQL REST API, **processing \$15,000+ in bookings**
- Redesigned the React/Next.js frontend with Mapbox venue maps for 30,000+ monthly visitors, **lifting bookings 12%**
- Built multi-room inventory, using a PostgreSQL exclusion constraint to reject double-bookings at the database level
- Test features with Jest unit and PostgreSQL-backed integration specs, plus Vitest and React Testing Library for UI

Orange County Urology Associates | *Contract Software Engineer*

Orange County, CA | **May 2025 – Jan 2026**

- Built UroAssist, a **HIPAA-compliant AI assistant used by 7 urologists** to query patient records in plain English
- Integrated ModMed's EHR over FHIR with OAuth/JWT authentication behind a React frontend and FastAPI backend
- Implemented RAG over patient records with embeddings in a Qdrant vector database, **cutting lookup time 80%**
- Containerized services with Docker on AWS and served a self-hosted Llama model to generate natural-language answers

Brown Economics Department | *Research Assistant*

Providence, RI | **Jan 2025 – Present**

- Build LLM pipelines for Prof. Rafael La Porta's research (with Harvard's Andrei Shleifer) on analyst growth forecasts
- Deployed Llama and FinBERT pipelines on Brown's Linux HPC cluster to mine **120,000+ analyst reports**
- Raised LLM scoring fill rate on an earnings-call pilot **from 30% to 98%** by tracing a smart-quote JSON parsing failure
- Replacing a Selenium scraper that broke on UI updates with Playwright automation in which an LLM picks browser actions

Full Stack at Brown [↗](#) | *Developer → Product Manager → Technical Director*

Providence, RI | **Feb 2025 – Present**

- Promoted twice in Brown's student software org, which builds web apps for campus clients; now lead engineering
- As PM, led a 10+ person team shipping the Brown Music Review [↗](#) and Grad Engineering Council [↗](#) sites; reviewed 52 PRs
- As Technical Director, co-wrote and teach a bootcamp taking new members from zero to their first full-stack app

PROJECTS

Evie Booking Widget [↗](#) | *Next.js, TypeScript, NestJS, PostgreSQL, OpenAI, Stripe, Twilio*

Jun 2026 – Present

- Built Evie solo: an LLM-powered booking widget for event venues, **later acquired by PartyPlace**
- Launched on **15+ venue sites, raising booking conversion 35%**; one flow serves package, flexible, and group bookings
- Built abandoned-booking recovery: guests who drop off get one Twilio SMS with a resume link, tracked in Amplitude
- Built an iMessage channel (Linq) over Evie's assistant, creating bookings only after Stripe webhook confirmation

Kalshi Matching Engine [↗](#) | *C++17, POSIX Sockets, Multithreading*

Feb 2026 – May 2026

- Built a C++ limit order book that recreates Kalshi's matching core, with a multithreaded TCP gateway for order entry
- Implemented price-time priority matching for limit and market orders, O(1) cancellation, and an MPSC order queue
- Optimized the hot path with integer-tick pricing, sustaining **2.8M orders/sec at ~350 ns median latency**

SKILLS

- **Languages:** Python, TypeScript, JavaScript, Java, C++, SQL
- **Frameworks & Libraries:** React, Next.js, React Native, Node.js, NestJS, FastAPI, Pandas
- **Tools & Platforms:** PostgreSQL, AWS (S3, Bedrock), Docker, Linux, Git, Jest, pytest, Stripe, Twilio, OpenAI API
